## **Digital Frontier**

**DFA3300 8 zones Alarm System** 

**Installer Manual** 

V1 rev 0

## **Programming Flow Chart Diagram**

## **Programming Address Summary DFA3300**

Add.	Description	Default Zone 1 2 3 4 5 6 7 8		
10	Entrance zone. Zone led on mean the zone is assigned as this type of zone.			
11	<b>Internal Delay zone.</b> Zone led on mean the zone is assigned as this type of zone.			
12	Internal zone. Zone led on mean the zone is assigned as this type of zone.			
13	<b>Instant zone.</b> Zone led on mean the zone is assigned as this type of zone.	0000000		
14	<b>24 Hour zone.</b> Zone led on mean the zone is assigned as this type of zone.			
15	<b>Fire zone.</b> Zone led on mean smoke detector is connected to this zone.			
16	<b>Silent zone.</b> Zone led on mean that the zone will not activate the siren when it is trigger. But it will still activate all telephone features.			
17	Normally Open zone. Zone led on mean normally open sensor is connected to this zone.	0000 0000		
18	<b>Zone respond.</b> On mean slow respond zone and off mean fast respond zone.	0000 0000		
19	<b>Intelligent zone group 1.</b> On mean zone is program to the intelligent zone group 1.	0000 0000		
20	<b>Intelligent zone group 2.</b> On mean zone is program to the intelligent zone group 2.	0000 0000		
21	<b>Zone Partition 1.</b> On mean zone is assign to partition 1.	••••		
22	<b>Zone Partition 2.</b> On mean zone is assign to partition 2.	0000 0000		
23	Auto reset Zone. On mean the zone will be restore after the bell time in [26].	••••		
24	<b>CMS report zone.</b> On mean zone trigger will report to CMS.			
25	Partition 1 user. On mean user has access right to partition 1.			
26	Partition 2 user. On mean user has access right to partition 2.			
30	CMS reporting.  Zone Led 1 on mean: Report Panic (activated keypad panic button).  Zone Led 2 on mean: Report Duress (user #8 will become duress code).  Zone Led 3 on mean: Report Arm/Disarm.  Zone Led 4 on mean: Report AC Loss  Zone Led 7 on mean: Report Bypass.  Zone Led 8 on mean: Report Battery low.  Communicator Setting 1.  Zone Led 1 on mean: Enable personal reporting.	••••••		
32	Zone Led 2 on mean: Enable CMS reporting Zone Led 8 on mean: Enable battery low trouble warning. Zone Led 1 on mean: Standalone panel (disable CMS)  Communicator Setting 2.  Zone Led 3 on mean: Enable double ring answering.	0000 0000		

Add.	Description	Default Zone 1 2 3 4 5 6 7 8
33	System Option.	••••
	Zone Led 1 on mean: Keypad buzzer on during entry delay.	
	Zone Led 2 on mean: Keypad buzzer on during exit delay.	
	Zone Led 3 on mean: Short beeping during delay.	
	Zone Led 4 on mean: DTMF dialing, else pulse dialing.	
	Zone Led 5 on mean: Enable one key arming using H or A.	
	Zone Led 6 on mean: Enable keypad panic button P.	
	Zone Led 7 on mean: Enable RF remote control arming.	

Number programming				
Add.	Description	Default Value		
40	Entry timer partition 1. From 0 to 255 sec.	040		
41				
42	Exit timer partition 1. From 0 to 255 sec.			
43	Exit timer partition 2. From 0 to 255 sec.	120		
44	<b>Bell timer</b> for auto reset zone. 0 to 255 minute.	005		
45	<b>Fast respond timer.</b> [0 to 255] * 1.6 ms.	008		
46	<b>Slow respond timer.</b> [0 to 255] * 1.6 ms	015		
47	<b>Intelligent zone counter 1.</b> 0 to 255 times. If counter exceed, intelligent zone group 1 trigger.	002		
48	<b>Intelligent zone counter 2.</b> 0 to 255 times. If counter exceed, intelligent zone group 2 trigger.	003		
49	<b>Intelligent zone reset timer 1.</b> 0 to 255 minutes. Intelligent zone group 1 counter reset timer.	010		
50	<b>Intelligent zone reset timer 2.</b> 0 to 255 minutes. Intelligent zone group 2 counter reset timer.	030		
51	PGM1 (Siren 2 negative, label as S2- on board).	008		
	000 mean PGM active when fully arm.			
	001 mean PGM active during entry or exit delay.			
	002 mean PGM active following keypad buzzer.			
	003 mean PGM is controlled by phone.			
	004 mean PGM active when trouble condition exists.			
	005 mean PGM active when siren on, PGM will turn off after some delay (delay follow Bell Timer value)			
	006 mean PGM active when use telephone line cut off.			
	007 mean PGM active when zone trigger.			
	008 mean PGM use as internal siren.			
	009 mean PGM use as smoke detector.			
52	PGM2 (Smoke Detector Power, label as SD- on board). Same as above.	009		
53	Reserved.	000		
54	Reserved.	000		
55	<b>Keypad lock digit.</b> 0 to 255 times of password error before keypad lock. (Prevent password guessing on keypad).	012		
56	<b>Keypad lock time.</b> 0 to 255 seconds keypad lock time.	060		

Add.	Description	Default Value
57	<b>Communicator Dialing time.</b> 0 to 255 second. Specified the time to wait for the user answer during personal reporting.	040
58	<b>Communicator Idle time.</b> 0 to 255 sec. Specified the time to wait for a key press before auto hang-up during personal reporting.	040
59	Communicator Dial loop. Number of time to dial on each telephone number. (for both personal and CMS reporting).	010
60	<b>Answer ring.</b> Number ring to wait before answer call. 0 to 255 ring. (Feature available with voice card module only)	008
61	Communicator Password Error auto-hang-up. Number of error password digit is allowed to key in before communicator auto	012
	hang-up. (Prevent password guessing through phone).	
62	CMS Periodic Report. 001 to 255 hour. (000 mean disable).	024
63	Reserved.	000
64	Reserved.	000
65	Reserved.	255
66	Reserved.	000
67	Reserved.	000

Other programming			
Add.	Description	Default Value	
70	CMS Account number 1. 4 digits Contact ID user code.	0000	
71	CMS Account number 2. 4 digits Contact ID user code.	0000	
72	<b>CMS Phone number 1.</b> Maximum 15 digits. P for pause 2 seconds. Ended phone number with #.	Nil	
73	<b>CMS Phone number 2.</b> Maximum 15 digits. P for pause 2 seconds. Ended phone number with #.	Nil	
74	<b>Area Code or Prefix 1.</b> Maximum 5 digits. P for pause 2 seconds. Ended phone number with #.	Nil	
75	<b>Area Code or Prefix 2.</b> Maximum 5 digits. P for pause 2 seconds. Ended phone number with #.	Nil	
76	<b>Change Installer code.</b> The 4 digit installer code must be key in 2 times. If both installer codes are different, it will not be save.	1397	
90	<b>Firmware version.</b> Display Firmware version.		
98	Reset user code. Reset all user code.		
99	Reset Panel. Reset all user code and programming setting except installer code.
