

## FASTEST P2P

VSS is specially designed for low bandwidth network like streamyx, private ip Maxis, Time, Telekom, 3G/4G sim card, YES & P1. What you need to do, just scan the QR Code and immediately you can view through your smartphone

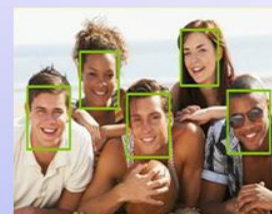

Fast and easy, no port forwarding, no configuration needed. When Brand X P2P is slow, they need to use DDNS, which you need to pay and bare the cost, worse still annual fee is increasing time by time. Who is going to absord this extra cost?

## FACE DETECTION

DVR will track faces and display the photo on the TV Screen, user can playback instantly by searching faces.

Phsycologically the theives will feel uncomfortable as the TV Screen is displaying their faces and monitoring them closely.

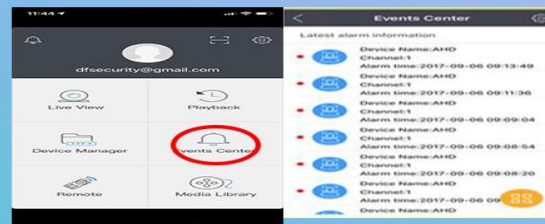

## PERIMETER INTRUSION DETECTION

Perimeter Intrusion Detection Systems are systems used for internal and external environment to detect the presence of an intruder attempting to breach a perimeter. The camera watches a virtual line and can be set to sound an alarm or notify you of any object entering, leaving or both to your smartphone and DVR. The DVR will snapshots on any alarm upon line-crossing or area intrusion.

## VSS EVENT CENTRE

We can check all the activities happen in the event centre such like face demo, perimeter detection and motion detection inside your smartphone. VSS Mobile APP can also backup events through smartphone and share it to others immediately without doing any conversion through PC.

## VSS DEVICES IN CLOUD

Store all your DVR devices into your VSS Mobile Account. When users lost or change their phone, it just need to log into VSS Mobile Account, and it will be able to restore all the devices that store earlier, instead of keying one by one.

## Instant Search On Events

When there are tags shown on the playback timeline, means something is happening. Therefore it reduce your unnecessary time on blindly searching the event you wanted.

## VIDEO OUTPUT HDMI, VGA, BNC

VSS comes with HDMI, VGA, BNC Output. Unlike others Only VGA and HDMI.

## PUSH NOTIFICATION

Whenever people pass by the virtual line that you drawn earlier, VSS will send you push notification to your smartphone like and alarm system.

## DRIVE BACKUP

In the event of DVR is being stolen, you can have alternative source to get recorded data picture.

- 1 - VSS AI MOBILE CLOUD STORAGE
- 2 - GOOGLE DRIVE BACKUP
- 3 - DROPBOX
