RF Interface

#### What is RF?

The RF ( Radio interface, coaxial cable interface, closed line interface) is an analog signal interface, which is supported by all TV sets.

BNC Interface

#### What is BNC?

The BNC (Bayonet NeillConcelman) connector is a miniature quick connect/disconnect radio frequency connector used for coaxial cable. It is different with cable TV's interface, which means that you can not use this adapter to convert cable TV signal.
