

# Smart AI Battery Camera

Extreme Design, Ultimate Experience

## Smart feature configurations

HD 1080P

WiFi

100% Wireless

PIR Detection

Two-way Talk

Waterproof & dustproof

Monitor area

Infrared night vision

Rechargeable battery

Mobile phone monitoring

AI Smart

**Free** cloud storage\*

\*limited storage space up to 7 days events or 1GB circulate

## Efficient installation is available in any places

Built-in rechargeable battery with no power wiring required. Installation is easy and worry-free, get rid of power supply restrictions, and can be installed everywhere.

## The wireless design is available everywhere

## Long-lasting protection

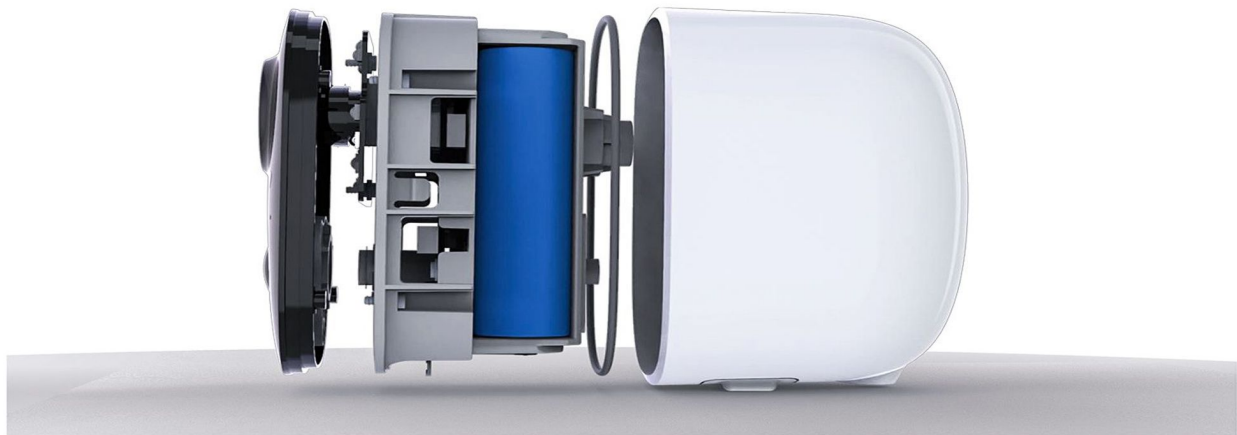

Built-in 5200mAh ultra-strong lithium power, battery capacity is higher than similar product standards, charging for 10 hours, providing up to **7 days** protection.

5200mAh Large capacity

USB Charging

## Ready for any weather

It can effectively protect the fuselage from the erosion of rainstorm and the damage caused by dust entering the fuselage. It can also easily deal with the bad environment such as rainstorm, sun exposure, sand dust, haze and so on.

# 1080P High Image quality

High-performance 1/2.9"CMOS sensors with resolutions up to 1080P and detailed imaging with wide-angle lens and capture every detail.

Wide-angle lens

HD

HD quality

## HD infrared night vision

Multi-channel infrared LED enhanced night vision, night vision shooting range up to 5-7 meters, and at black place can also be shot clearly, so it's 100% safe at night.

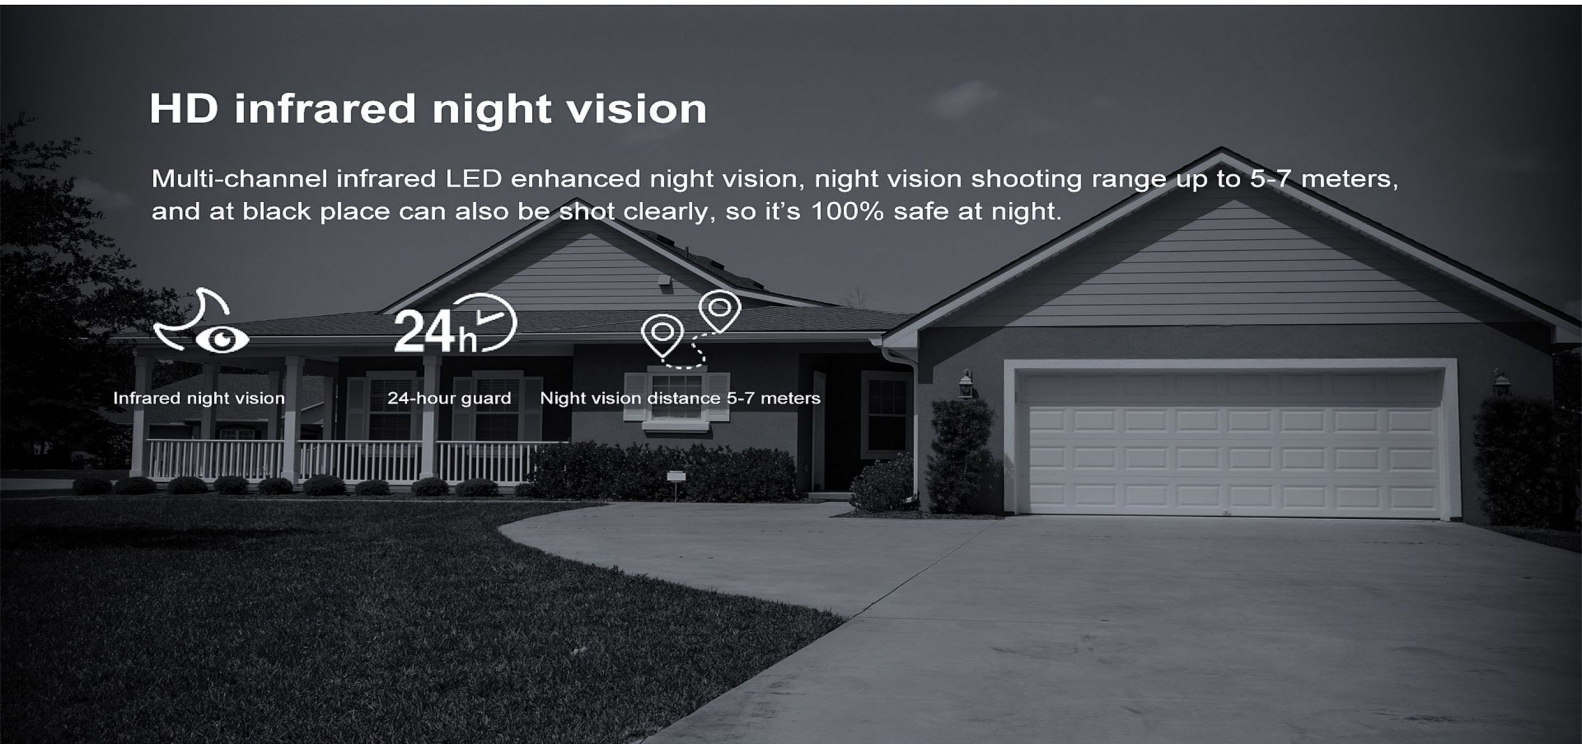

Infrared night vision

24-hour guard

Night vision distance 5-7 meters

## Mobile APP

Use mobile APP to remotely monitor home with live streaming and playing back video record

Two-way talk

Smart play back

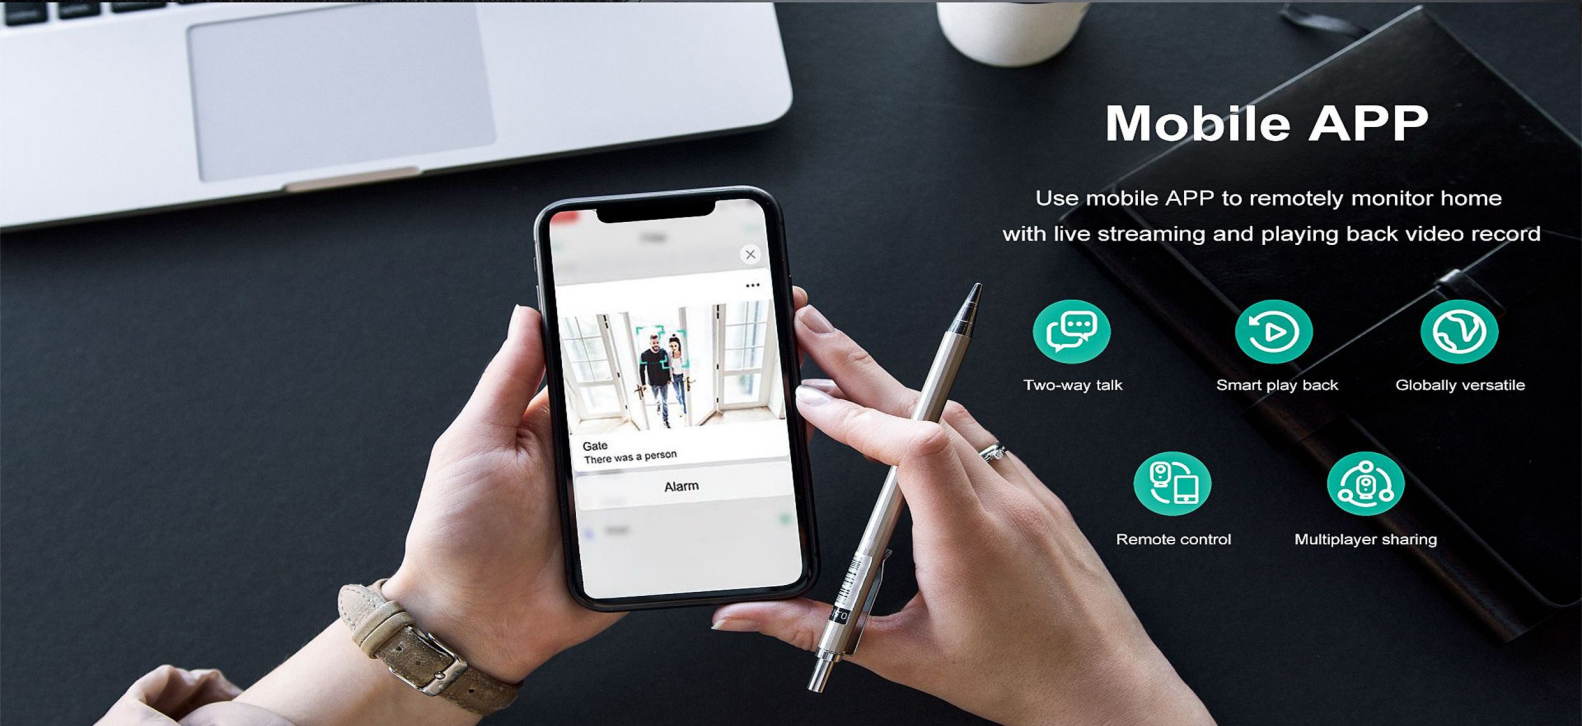

Globally versatile

Remote control

Multiplayer sharing

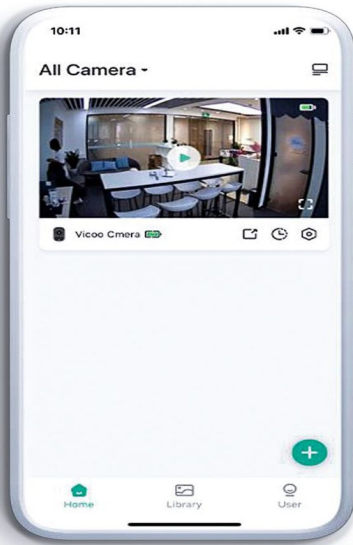

# Camera share management

Through the APP can share the camera to friends and family to use together, family and friends can sweep the code to get part of the use of permissions, simple and fast

Sweep code sharing

Camera sharing

## PIR infrared sensing triggers intelligent and efficient power in the cloud

PIR infrared sensing technology and cloud image analysis capabilities.

The camera is triggered by PIR and can be determined quickly and in real time in the cloud - accurately pushing based on the results of Ai object analysis in the cloud.

## AI Smart Technology

### Object recognition and behavior analysis

Artificial intelligence algorithms that intelligently identify objects such as people, vehicles, pets, packages, and analyze their behavior. Intimate refinement of analysis results (passing, staying, leaving, etc.) Instant push to APP, easy to monitor even at the far place.

Human recognition

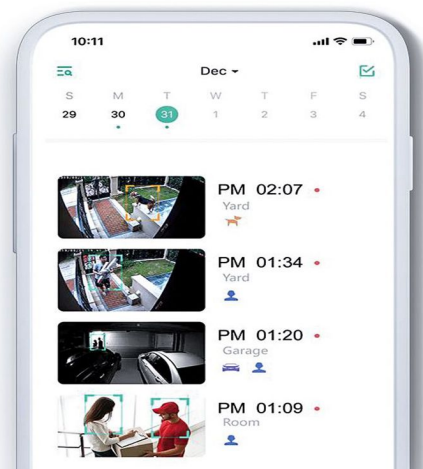

Vehicle identification

Pet identification

Package identification

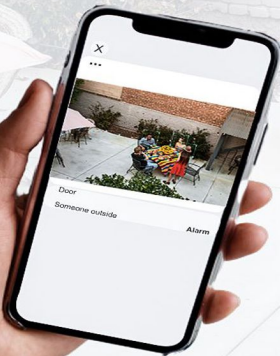

## Monitor area

- Custom monitor area, mobile APP accurately draws the area. Filtering out-of-area unrelated information during the push process Focus on key area.

## Smart push

Monitoring target through APP settings, cloud AI systems only identify the corresponding target when the message push.

Push strangers or family events

Push pet activity

Package pick-up and drop-off reminders

Vehicle parking reminder

## Two-way voice real-time talk

Built-in waterproof microphone and high-fidelity speakers

In case of abnormal situations can be remotely speaking, real-time warning timely stop loss, free time and place real-time chat, experience intimate interaction

## Two storage methods

### Cloud storage

Provides up to **7 Days** cloud storage

### Local storage

Micro-SD card storage supports up to 128GB and can be recorded in a networkless environment

\*Some cloud storage and AI services are available at an additional cost, as detailed in the APP.
